

Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Date: 27 JUNE 2025

NM ID: 99FCD0114CB4CB29D944F8D19DABB9DE

Project Name: Streamlining Ticket Assignment for Efficient Support Operations

Maximum Marks: 4 Marks

Functional Requirements

Following are the functional requirements of the proposed solution.

FR-1	Ticket Creation	Users can create a new support ticket through a form. Ticket details include issue type, description, and priority.
FR-2	Ticket Assignment	System automatically assigns tickets to available support agents based on workload and expertise. Admin can manually reassign tickets if needed.
FR-3	Ticket Status Management	Agents can update ticket status (Open, In Progress, Resolved, Closed).
FR-4	Notification System	Automatic notifications sent to agents and users when tickets are created, updated, or resolved.
FR-5	Performance Dashboard	Dashboard displays agent performance metrics such as resolution time and ticket volume.

FR-6	Escalation Mechanism	System automatically escalates unresolved tickets after a set time threshold.
------	----------------------	---

Non-Functional Requirements

Following are the non-functional requirements of the proposed solution.

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	The interface should be user-friendly for both agents and admins.
NFR-2	Security	Only authorized users can view or modify ticket assignments.
NFR-3	Reliability	The system must ensure accurate and consistent ticket assignment.
NFR-4	Performance	Ticket assignment and status updates should occur in real time.
NFR-5	Availability	The system should be operational 24/7 to support global users.
NFR-6	Scalability	The solution should efficiently handle a growing number of tickets and agents.
